

WORSHIP MIDI Files

MIDI files

Three different versions are provided. As regular MIDI users know, these files are not plug-and-play. You need to change the patches to match your instrument. This is why some files won't sound good on a computer.

Some of these files use very few controllers (volume, reverb, weight, etc.). This makes it easy to adjust for your local instrument. These files contain the following tracks:

1. Piano Accompaniment
2. Melody Flute (when sung only)
3. Guitar Accompaniment (mirroring the piano)
4. Background Strings

Files with "Patches" in the name contain synthesizer patches corresponding to a Yamaha Motif ES.
